## Velocity Calculation:

Total Story Points Completed: 79

Total Duration: 24 days

Average Velocity = 3.29 points/day

## Burndown Chart Analysis:

The burndown chart shows a consistent downward trend, representing effective sprint completion and minimal delay.

Slight variation between planned and actual story points occurred during integration testing, but by the final day, all tasks were completed as planned.

This reflects **steady progress, good task distribution, and team collaboration efficiency**
